Urinary bladder

2- Peritoneal covering :

In male, the peritoneum passes down from anterior abdominal wall covering upper surface of the urinary bladder & upper part of posterior surface. Here, it sweeps backward to reach anterior aspect of the rectum, forming **rectovesical pouch.**

ANU MEDICAL SCHOOL PROGRAM

Urinary bladder

2- Peritoneal covering :

In female, the peritoneum passes down from the anterior abdominal wall to the upper surface of the urinary bladder. It then runs directly onto the inferior surface of the uterus forming the **utero-vesical pouch**, then it covers the fundus, body of the uterus and the posterior surface of the cervix and continues to cover the upper part of the posterior surface of the vagina to reflect on the rectum forming **rectouterine (Douglas) pouch**.
