Lect.39 : kidney and ureter (Anat.12)

ALEXANDRIA NATIONAL UNIVERSITY
ANU MEDICAL SCHOOL PROGRAM

kidney and ureter

ILOs:

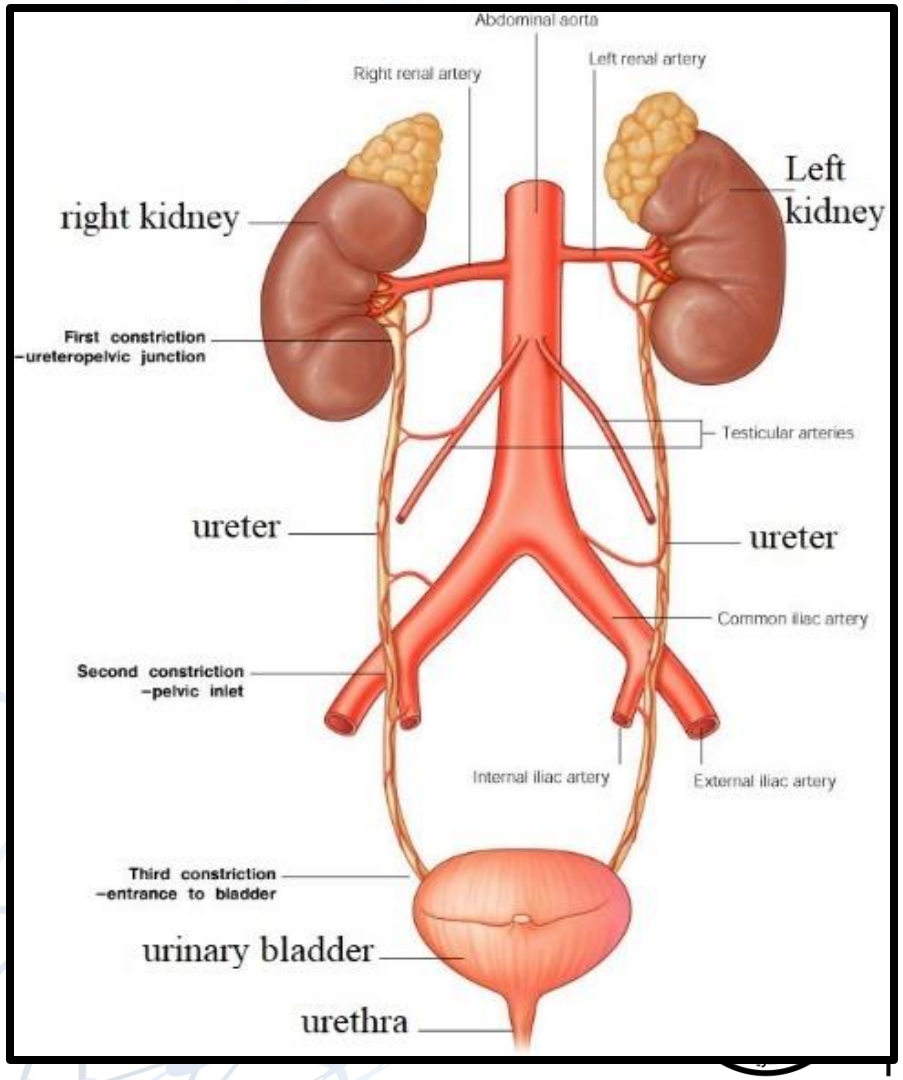

1. Describe the normal site, size, shape, position of the kidney and ureter.
2. Relate the location of both kidneys and ureter in relevance to the surrounding organs and structures.
3. Correlate blood supply and innervation of kidneys and ureters to their origin.
4. Correlate the innervation of the ureter with renal pain and ureteric stones.

ANU MEDICAL SCHOOL PROGRAM

The Kidney

Site: The kidneys lie on the posterior abdominal wall on either side of the vertebral column. It extends from T12–L3. The right kidney lies slightly lower than the left kidney because of the large size of the right lobe of the liver.

Size: approximately 12cm long x 6cm wide x 4cm thickness.

ANU MEDICAL SCHOOL PROGRAM

Shape of the kidney

2 borders (medial, lateral)

2 poles (Superior, inferior)

2 surfaces (anterior, posterior)
