Blood supply of the kidney

Arterial supply

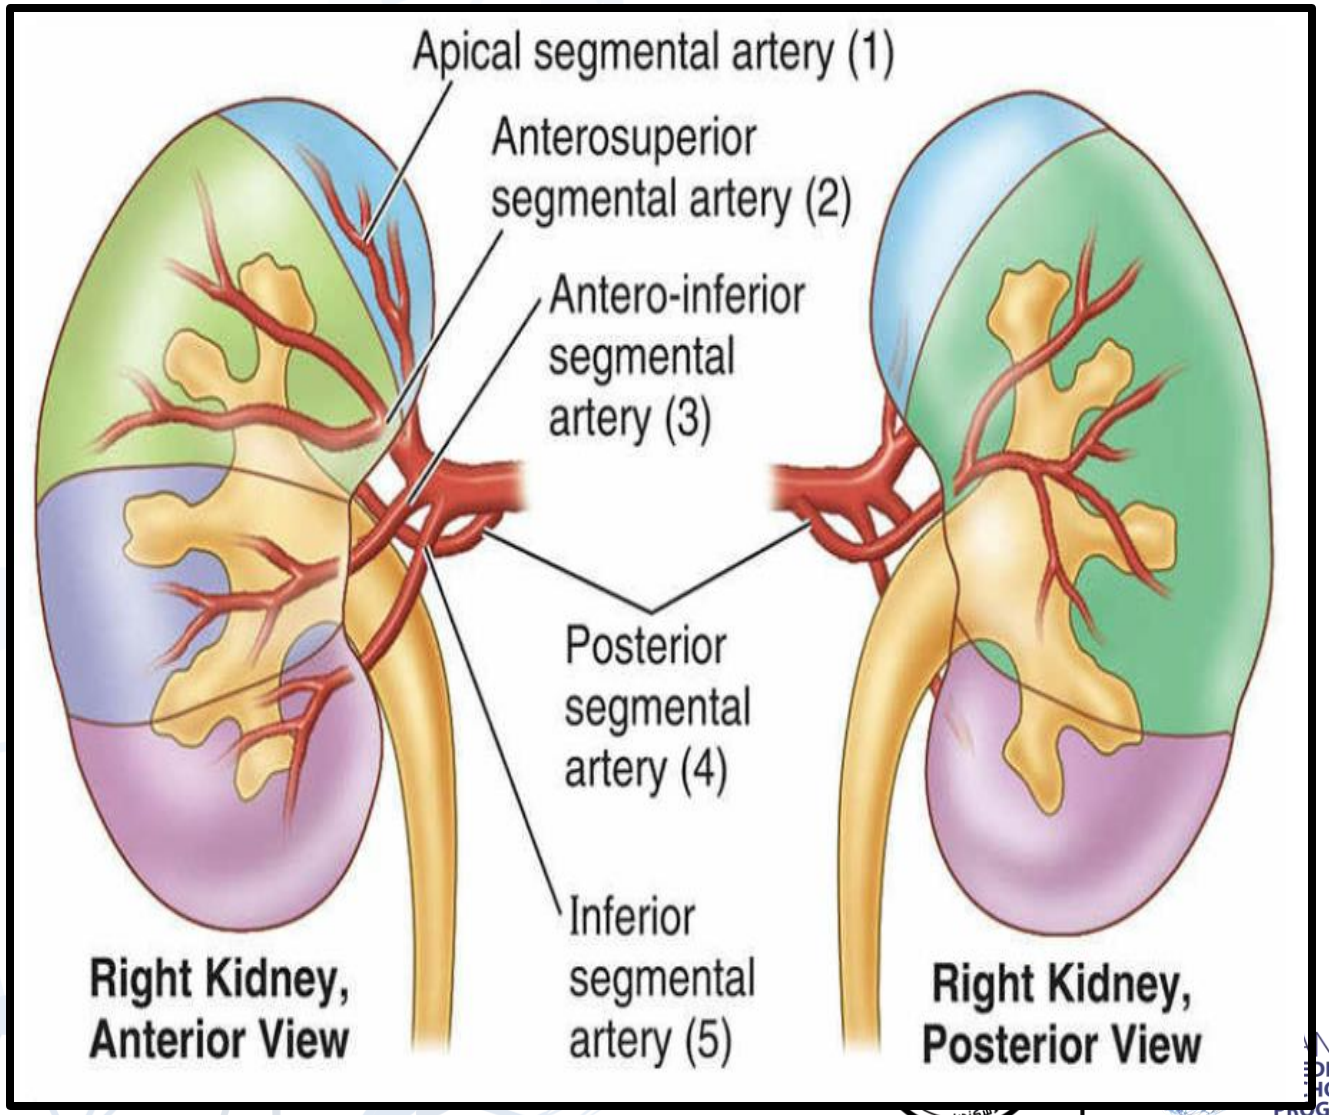

Renal arteries arise from the abdominal aorta at L2.

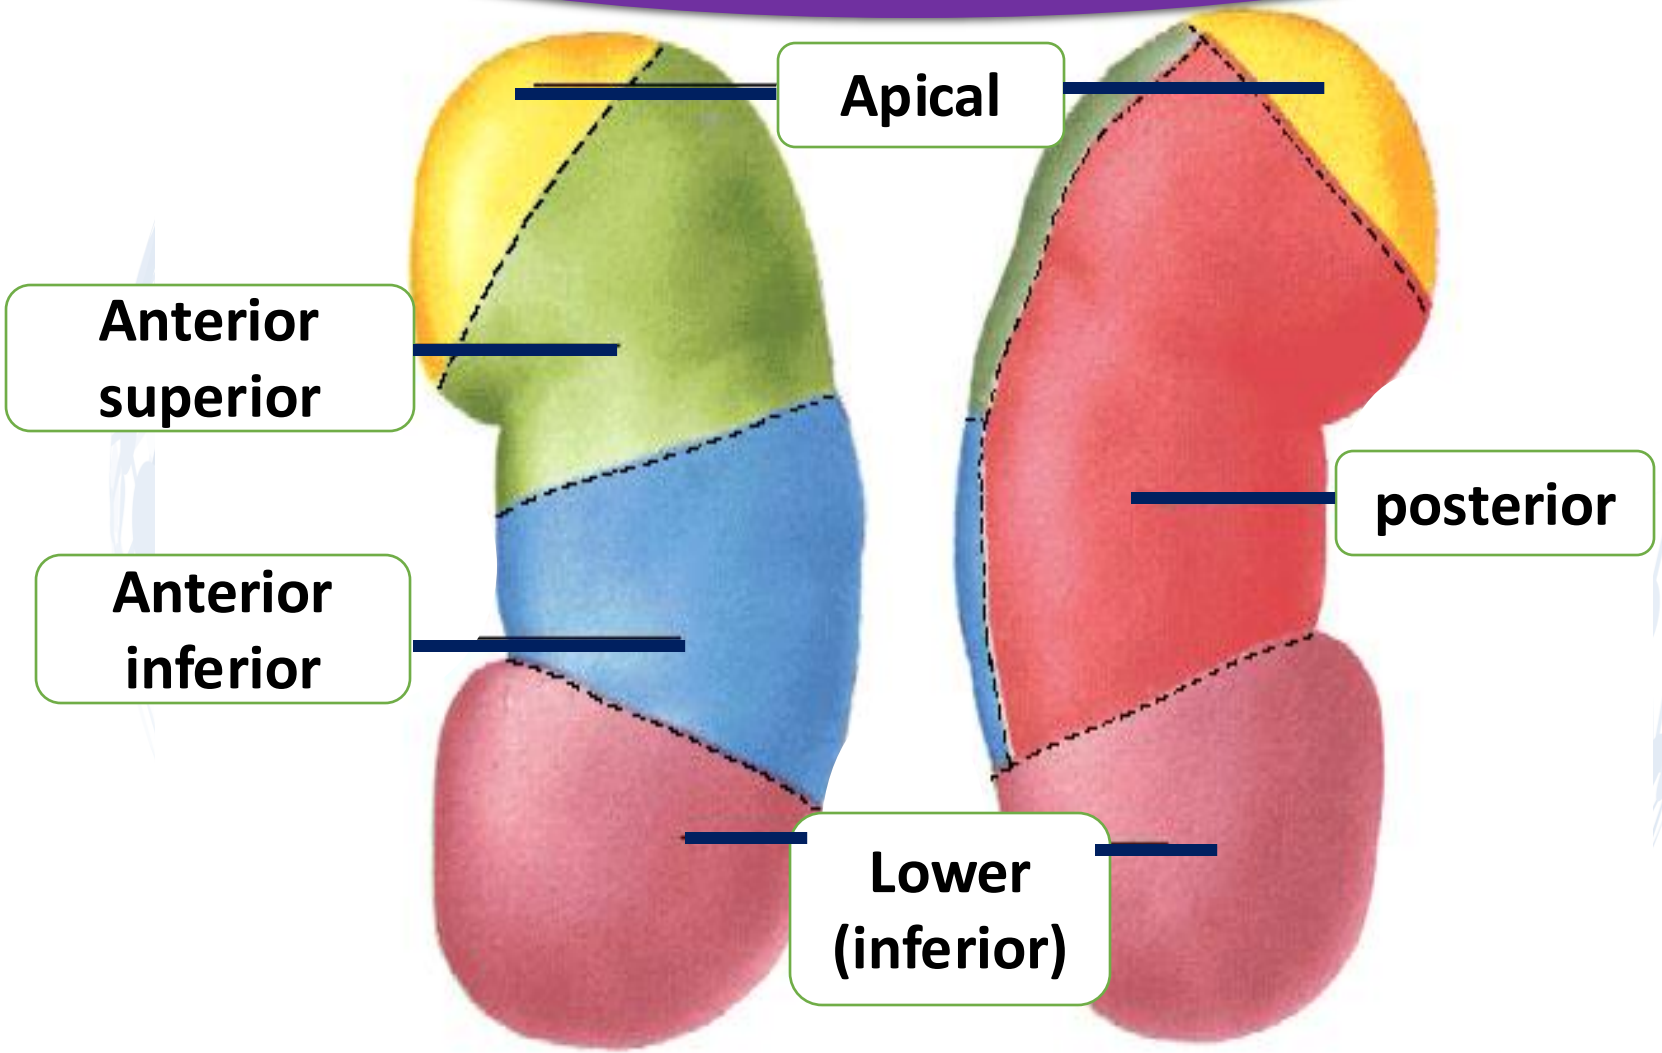

ANU MEDICAL SCHOOL PROGRAM

The Kidney

Close to the hilum of each kidney, the artery divides into five segmental end arteries. These segmental arteries supply the segments of the kidney.

Kidney segmentation

anterior surface of kidney

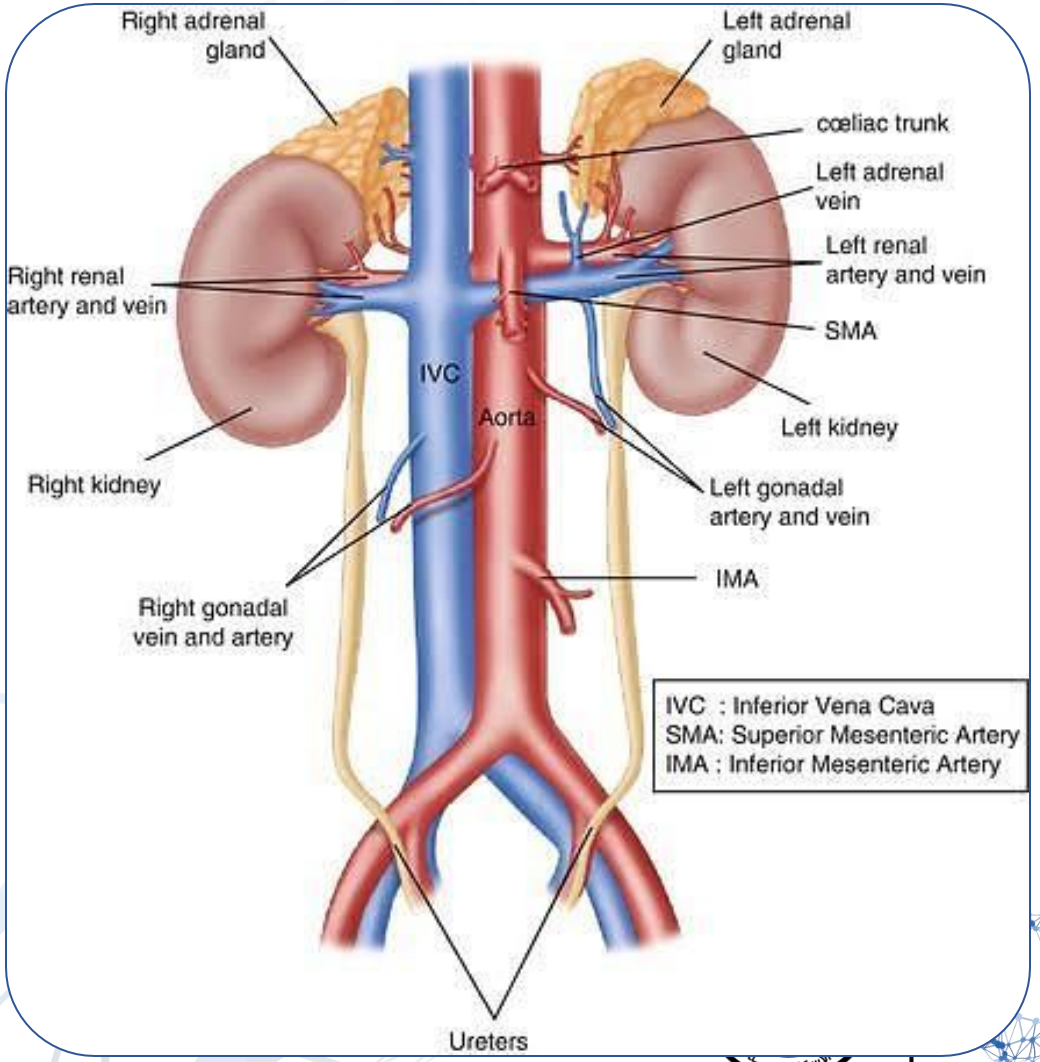

Posterior surface of kidney

ANU MEDICAL SCHOOL PROGRAM

The Kidney

Venous drainage:

Renal vein: runs anterior to the renal artery as it leaves the hilum. The renal veins drain into inferior vena cava.

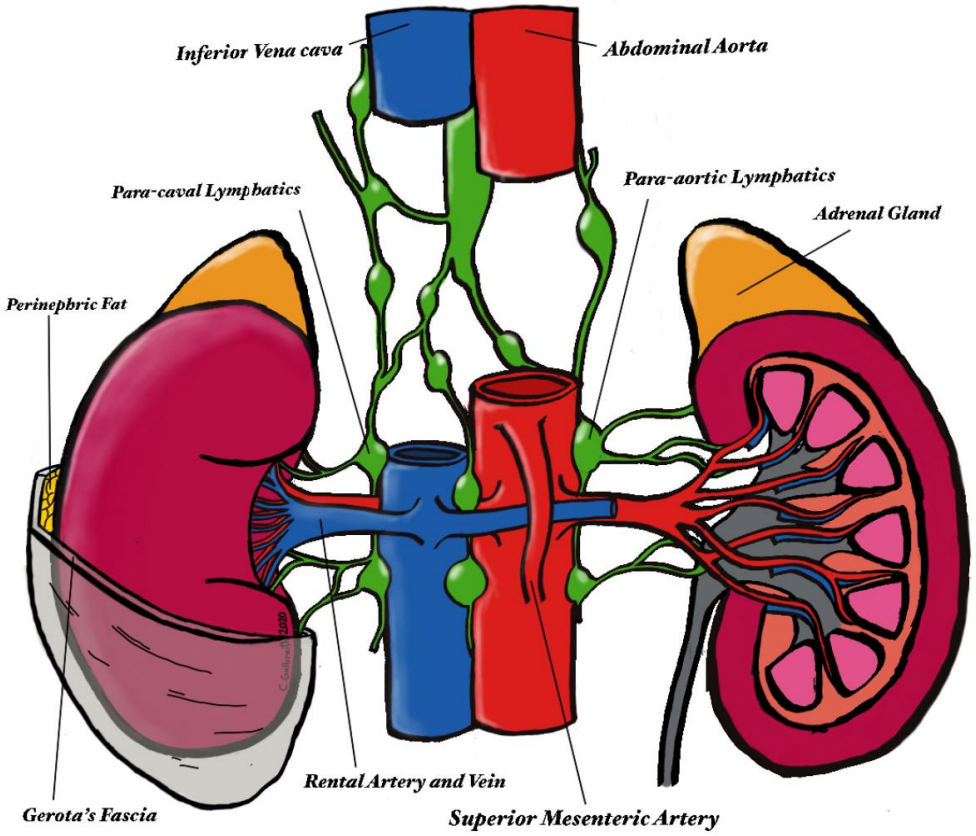

ANU MEDICAL SCHOOL PROGRAM

The Kidney

Lymphatic drainage:

Para-aortic and **lumbar** lymph nodes.
