2- Renal Pain & Colic

Renal pain is referred to the flank and may radiate downward into the lower abdomen.

In renal colic: The renal pelvis and the ureter send their afferent nerves into the spinal cord at segments T11,12 and L1,2. The spasm of the smooth muscle causes an agonizing colicky pain, which is referred to the skin areas that are supplied by these segments of the spinal cord, namely, the flank, loin, and groin.
