Pudendal nerve

ANU MEDICAL SCHOOL PROGRAM

Pudendal nerve

Pudendal nerve

Origin:

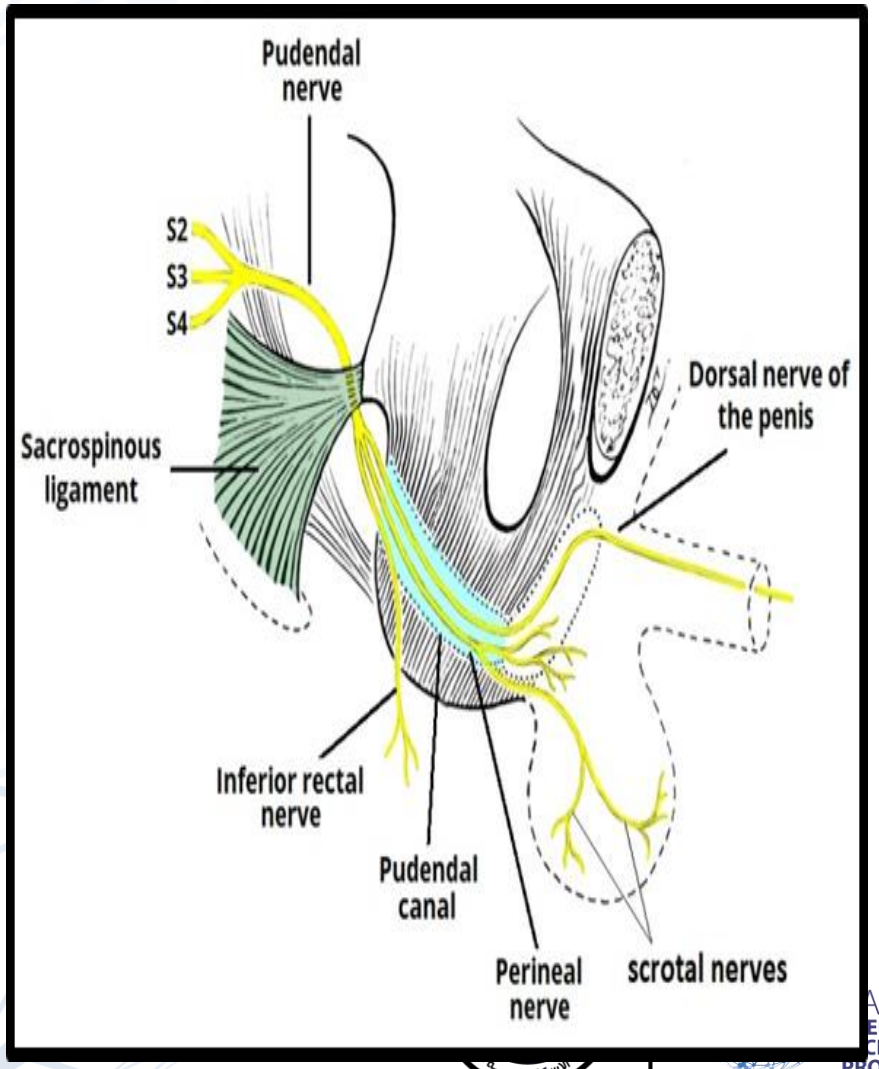

It is one of the two terminal branches of the sacral plexus.

Course:

- It leaves the pelvis through the greater sciatic foramen to the gluteal region then through the lesser sciatic foramen to the perineum.
- It passes through the pudendal canal.

Termination:

Perineal nerve and dorsal nerve of the penis or clitoris.

Pudendal nerve

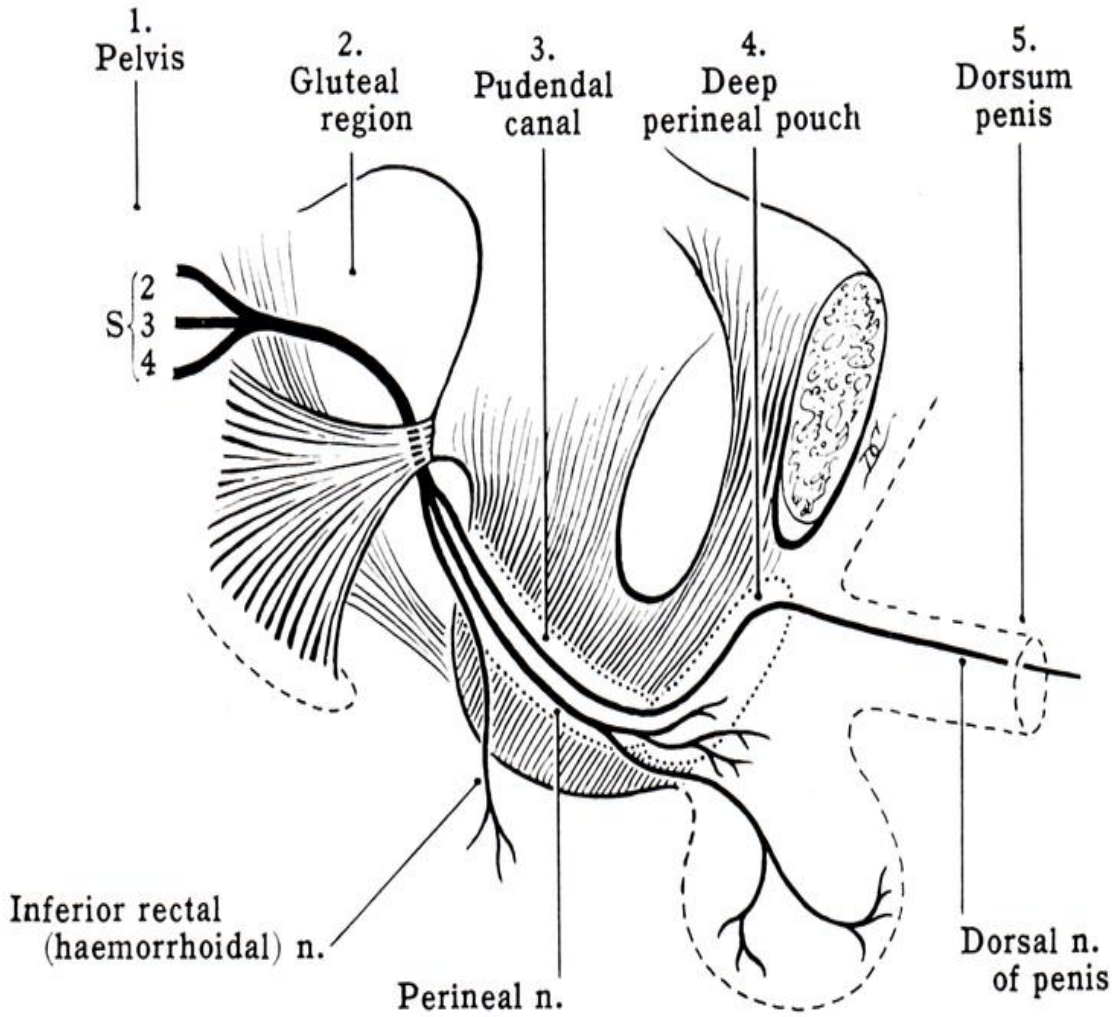

Branches :

1- Inferior rectal nerve that passes in the ischiorectal fossa to supply the external anal sphincter and levator ani muscle.

2- Perineal nerve: that gives :

a. muscular branches to the muscles of the perineum.

b. scrotal or labial nerves to the scrotum or labia majora.

Pudendal nerve

Branches :

3- Dorsal nerve of penis or clitoris: that pierces the perineal membrane and supplies the dorsal aspect of the penis or clitoris.
