Internal pudendal artery

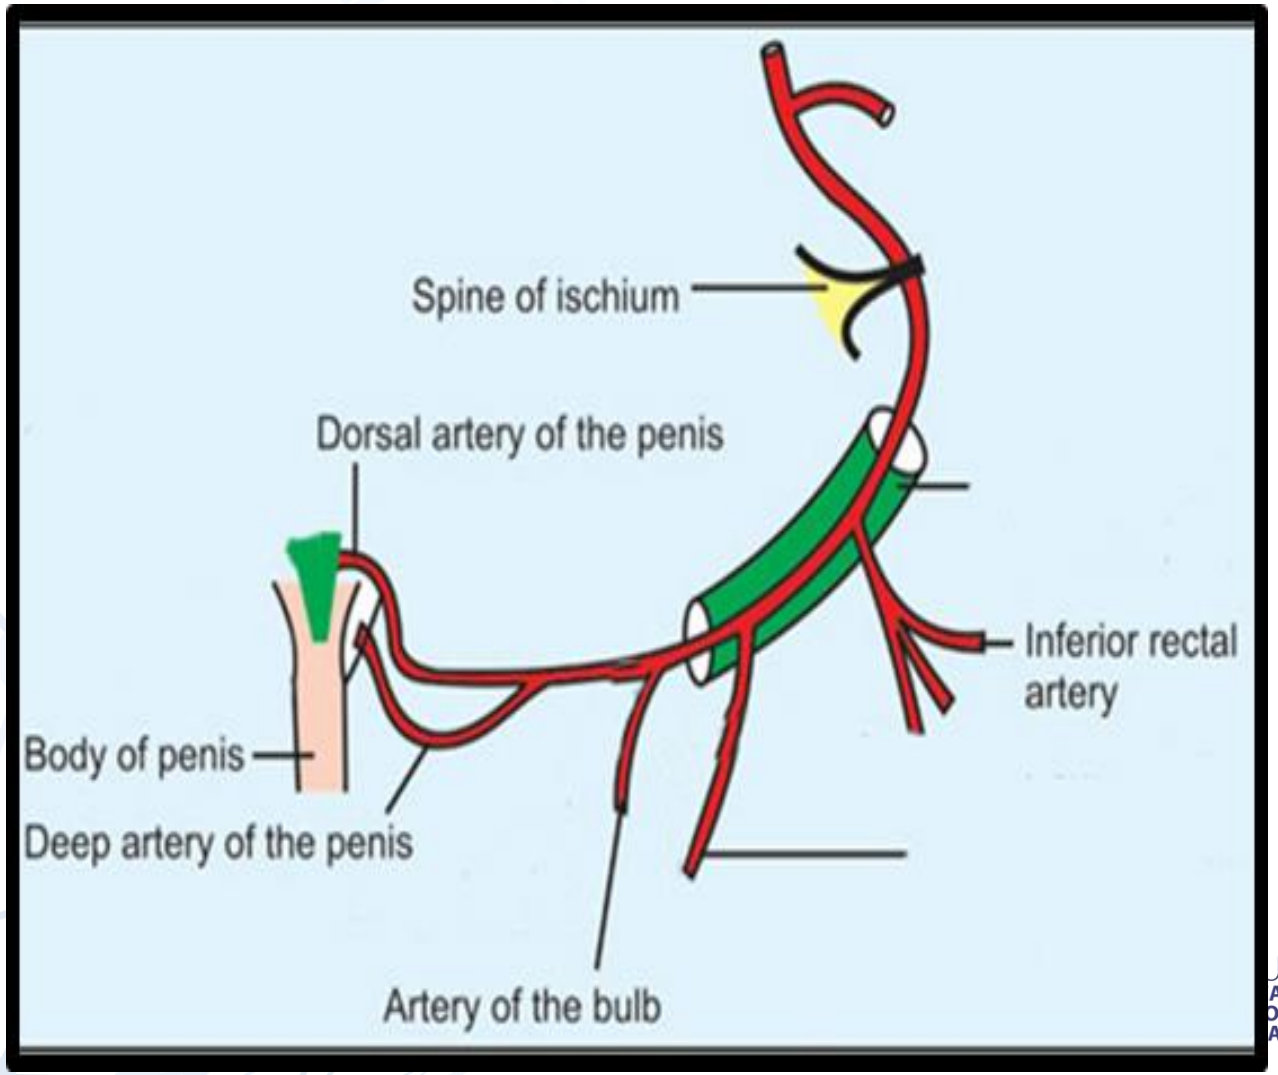

ANU MEDICAL SCHOOL PROGRAM

Internal pudendal artery

Origin:

It is one of the two terminal branches of the anterior division of the internal iliac artery.

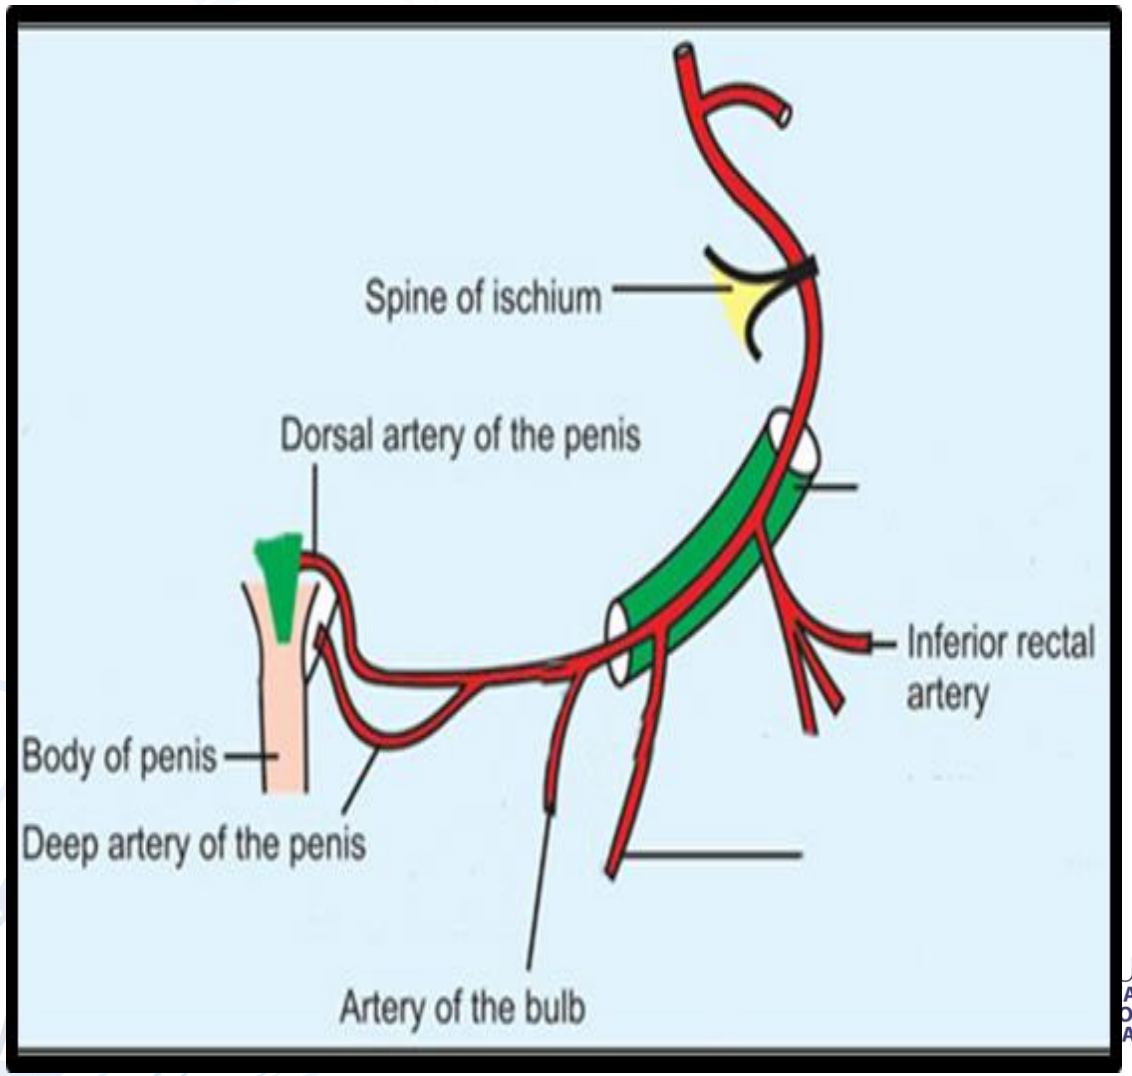

Internal pudendal artery

Course:

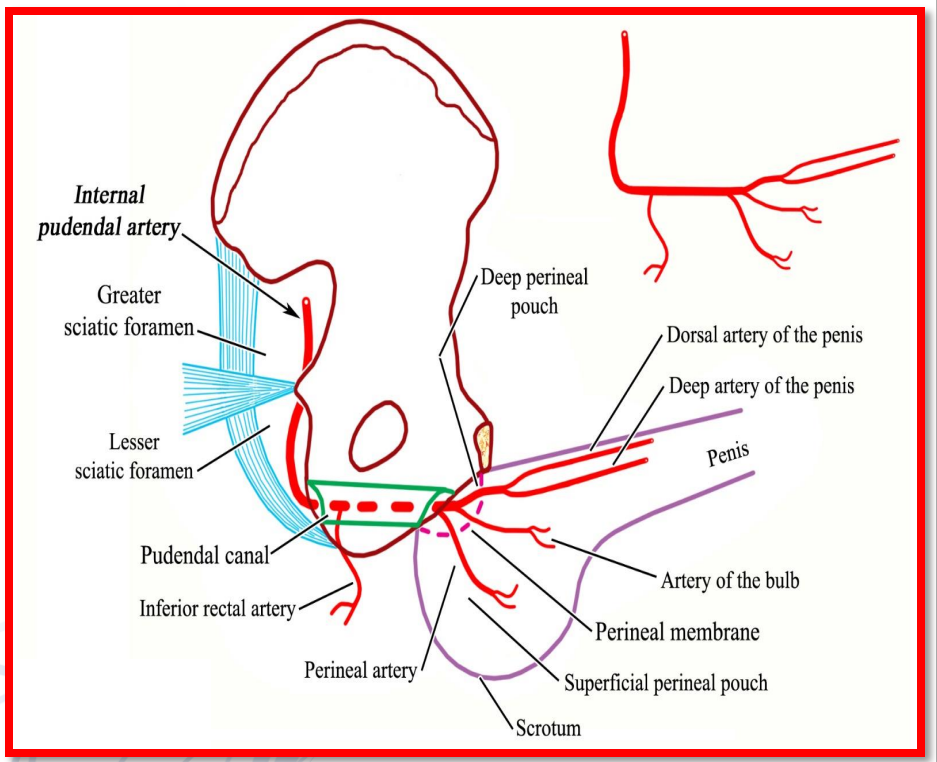

- It leaves the pelvis through the greater sciatic foramen to the gluteal region then through the lesser sciatic foramen to the perineum.

- It passes through the pudendal canal then through the deep perineal pouch and pierces the perineal membrane.

Branches

- Artery of the bulb
- Inferior rectal artery
- Deep artery of the clitoris /penis
- Branches
- Dorsal artery of clitoris / penis
- Perineal artery

ALEXANDRIA NATIONAL UNIVERSITY

ANU MEDICAL SCHOOL PROGRAM

Termination

By division into 2 terminal branches

- Deep artery of penis/clitoris
- Dorsal artery of penis/clitoris
