Position of the uterus

Anteflexed

Angle of flexion : between the body and cervix (170°).

Anteverted

Angle of version: between the cervix & vagina (90°).

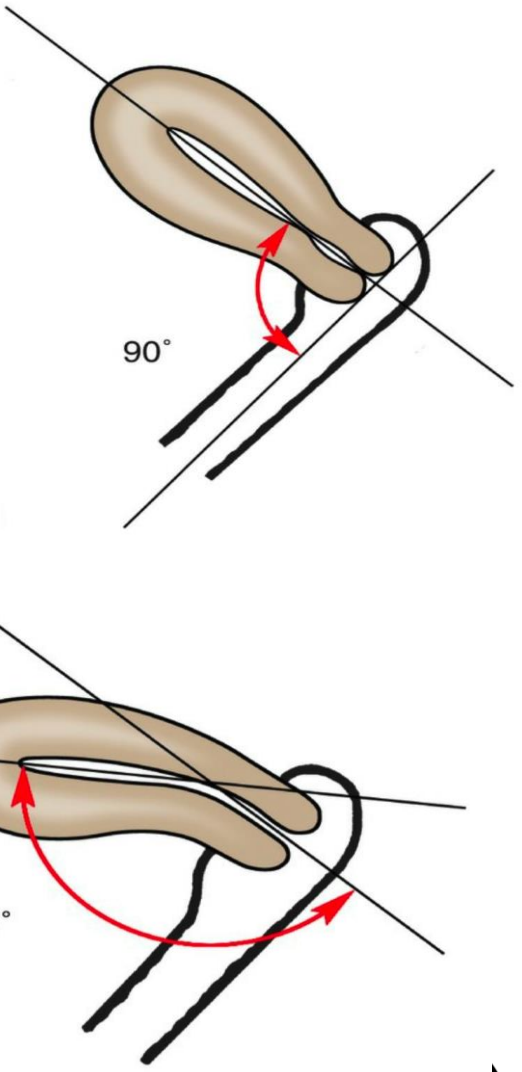

ANU MEDICAL SCHOOL PROGRAM

Describe the normal position of the uterus

Normal position: Anteverted, Anteflexed:

- AnteVersion → 90° degrees, measured from the angle between the vagina and the cervical canal.
- Anteflexion → 170° degrees, measured from the angle between the uterine and cervical canal.

ANU MEDICAL SCHOOL PROGRAM

Uterus

N.B. if the angle of flexion is more than 170°, the position is called retroflexed. - if the angle of version is more than 90°, the position is called retroverted.

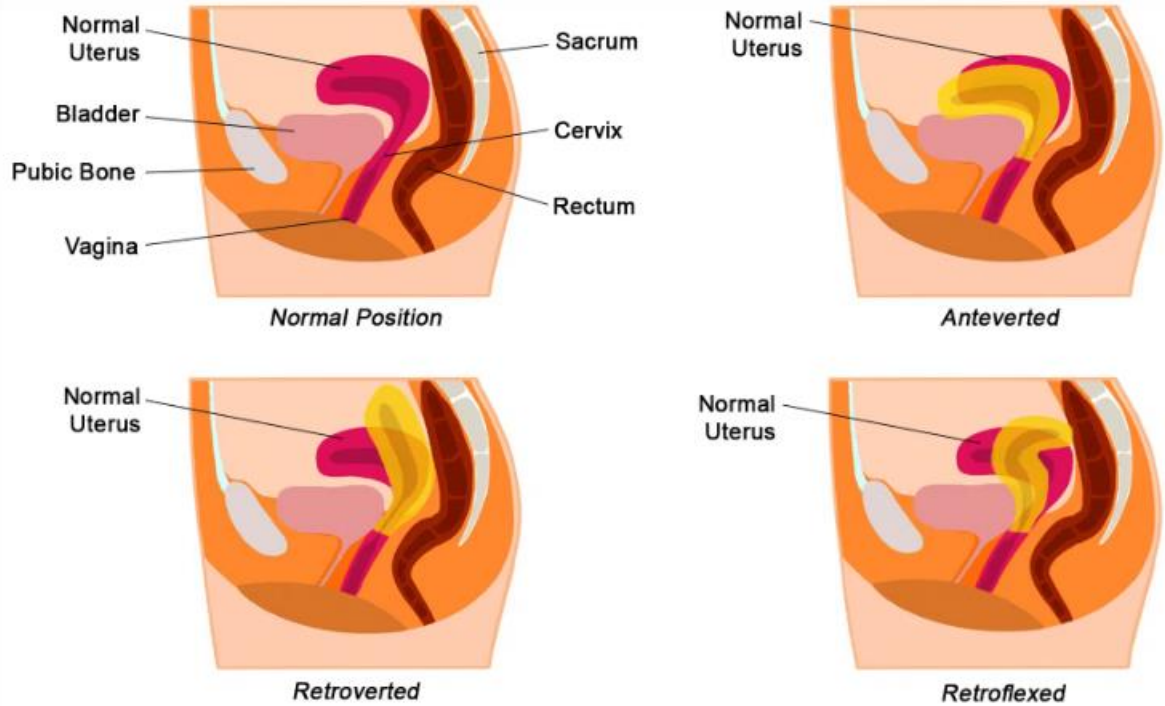

Fig 4

The normal, anteverted, retroverted and retroflexed positions of the uterus.
