Ovary

- It has 2 borders :
- Anterior border : attached to the mesovarium.
- Posterior border : free.

- **Peritoneal covering :**
- It is completely covered by peritoneum except the anterior border that is attached to the mesovarium

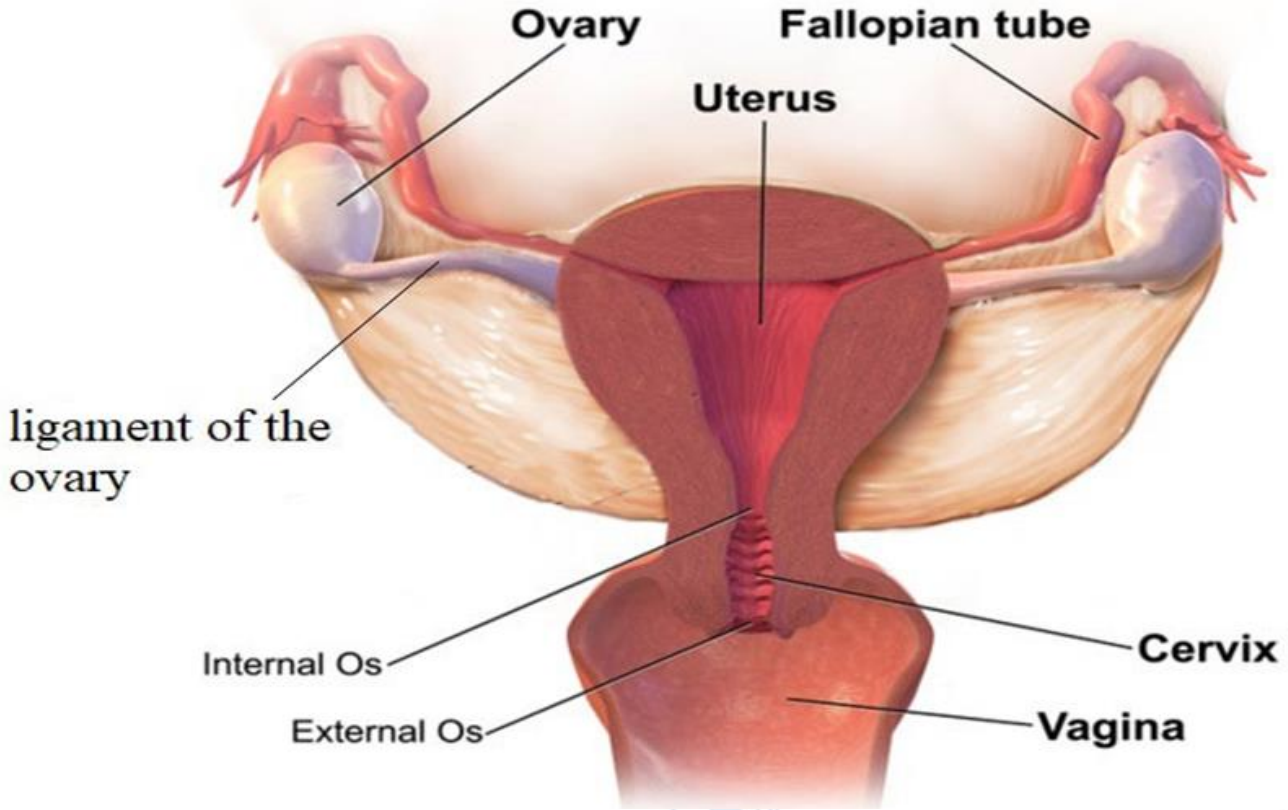

Ovary

- It has 2 ends :
- Tubal (upper) end : attached to fimbria of the uterine tube and suspensory ligament of the ovary.

- Uterine (lower) end : attached to the lateral angle of the uterus by the ligament of the ovary below and behind the opening of the uterine tube.

ANU MEDICAL SCHOOL PROGRAM

Ligaments of the ovary

1. Suspensory ligament : It connects upper end of ovary to the lateral pelvic wall and contains the ovarian vessels and nerves.

2. Ovarian ligament : It connects the uterine end of the ovary to the lateral angle of the uterus.

3. Mesovarium : It connects the anterior border of the ovary to the broad ligament.
