Cervix

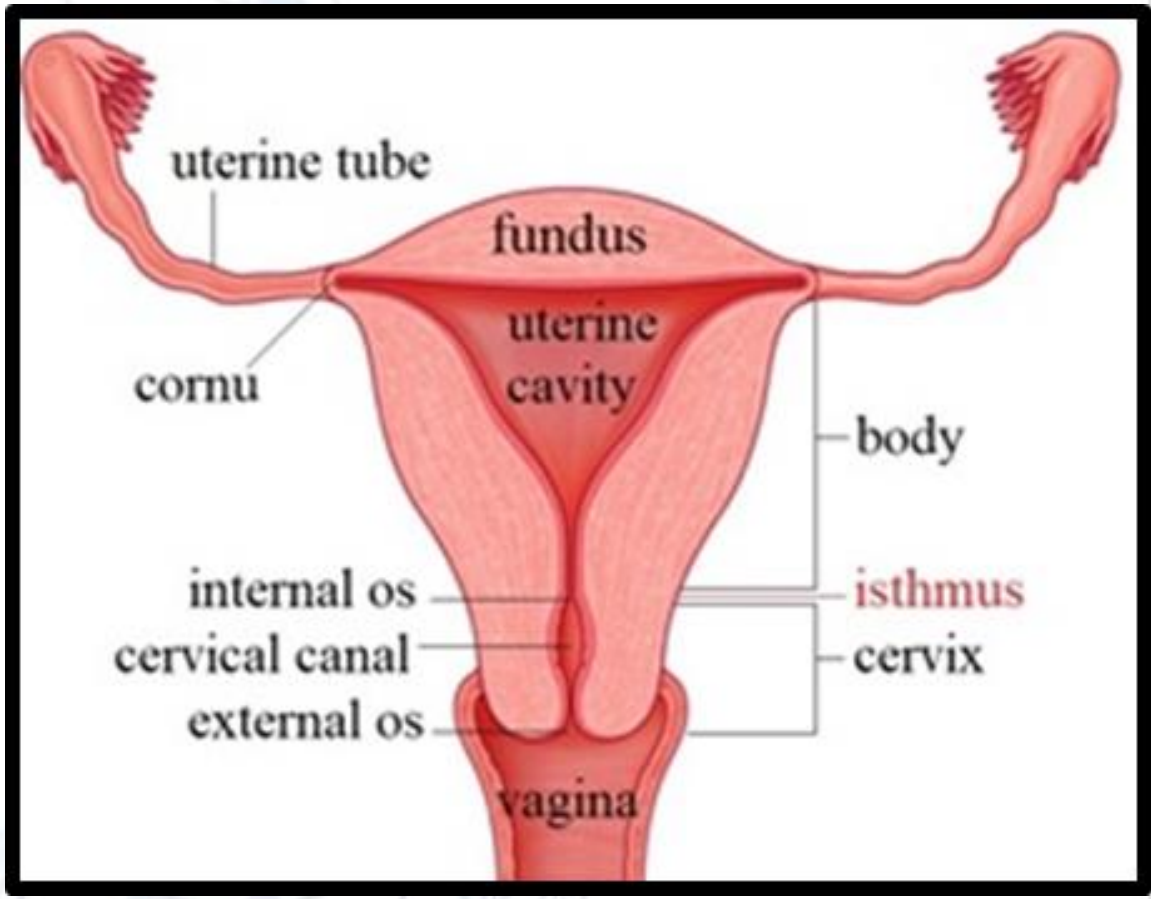

ANU MEDICAL SCHOOL PROGRAM

- The cavity of the cervix is called cervical canal that is connected with uterine cavity at the **internal os** and opens in the vagina at the **external os**.
- The external os is rounded in nulli-para and as a slit in women who borne children.

ANU MEDICAL SCHOOL PROGRAM

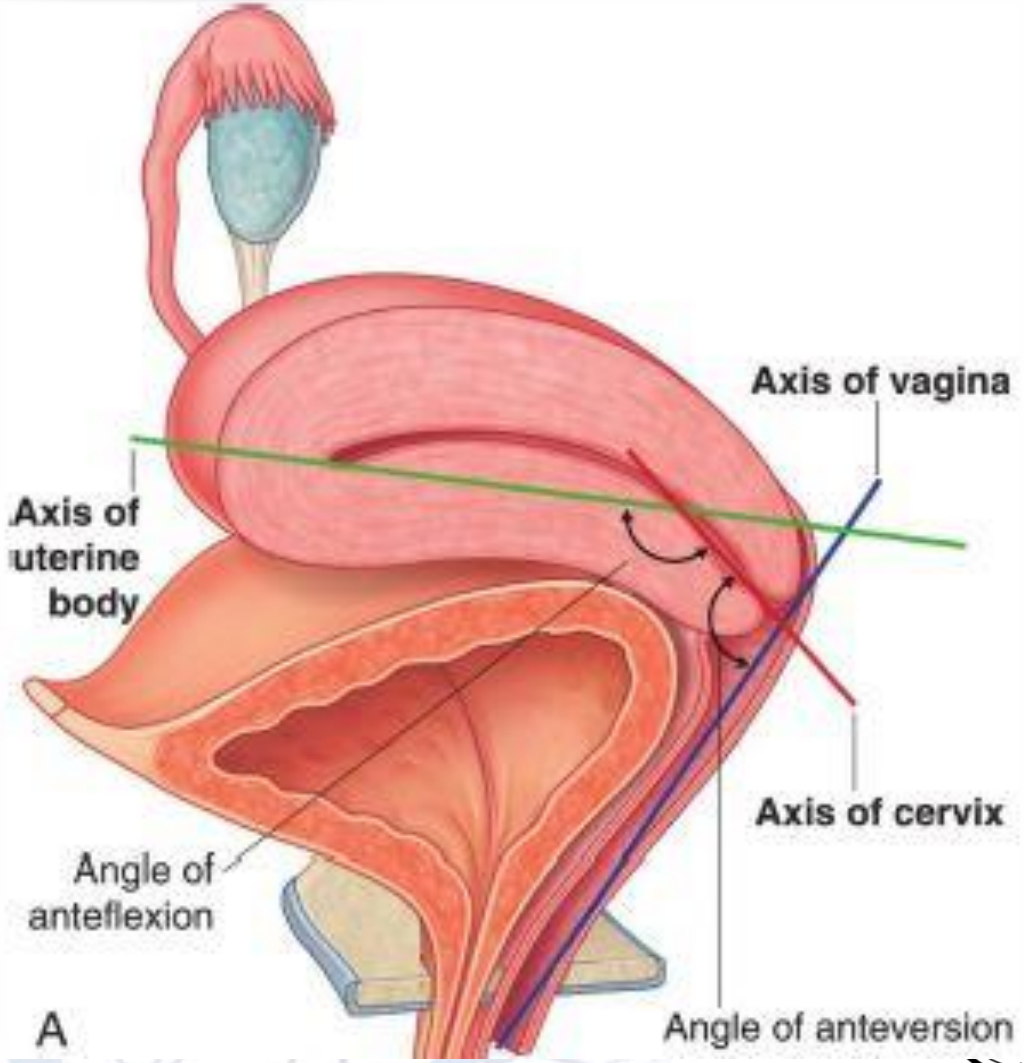

Position of the uterus

Anteflexed

Angle of flexion : between the body and cervix (170°).

Anteverted

Angle of version: between the cervix & vagina (90°).

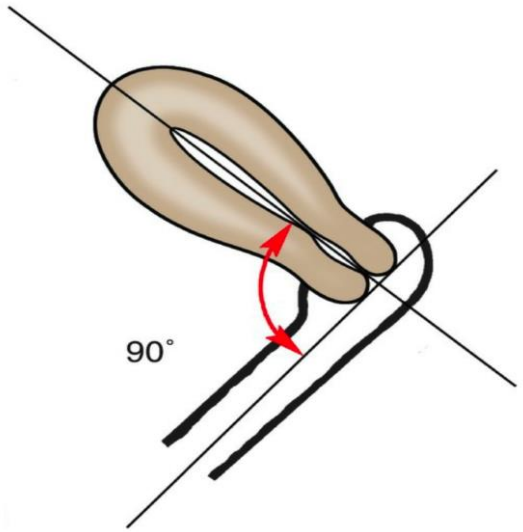

ANU MEDICAL SCHOOL PROGRAM

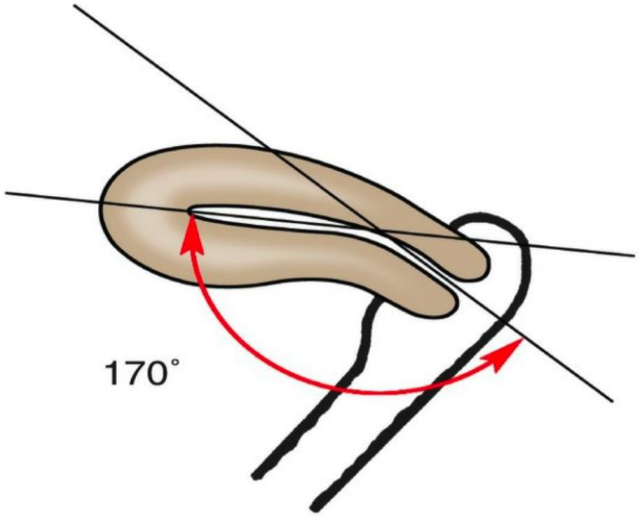

Describe the normal position of the uterus

Normal position: Anteverted, Anteflexed:

- AnteVersion → 90° degrees, measured from the angle between the vagina and the cervical canal.

- Anteflexion → 170° degrees, measured from the angle between the uterine and cervical canal.
