Arterial supply of the uterus

Branches of the **uterine artery**

Tubal branches

Uterine branches

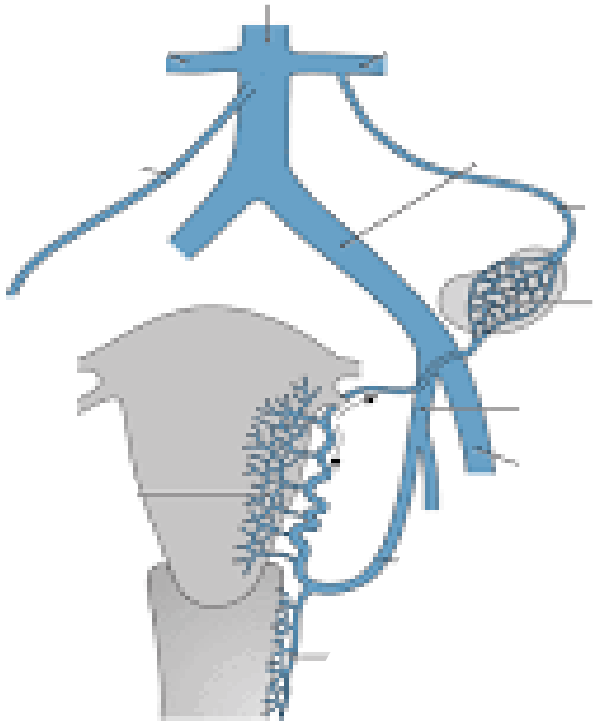

Ureteric branches

Vaginal branches

ANU MEDICAL SCHOOL PROGRAM

Venous drainage of the uterus

Uterine venous plexus → **drains into internal iliac vein**

ALEXANDRIA NATIONAL UNIVERSITY
ANU MEDICAL SCHOOL PROGRAM

Blood supply of the uterus

Uterine artery :

- Origin: anterior division of the internal iliac artery.
- It passes lateral to the cervix where it crosses the ureter.
- It passes a tortuous course along the side of the uterus between the 2 layers of the broad ligament till the uterine tube where it turns laterally to anastomose with the ovarian artery.

- Branches : to the uterus, medial part of the uterine tube, vagina and ureter

Posterior view of the arterial supply to the female reproductive tract.

ANU MEDICAL SCHOOL PROGRAM

Lymphatic drainage :

- Fundus and upper part of the body : to the para-aortic lymph nodes along the ovarian vessels.
- Cornua : to the superficial inguinal lymph nodes along the round ligament.
- Lower part of the body and cervix : Internal iliac lymph nodes.
