Female reproductive system II

Prof. Dr. Abdelghany Hassan Abdelghany
Professor of Anatomy and Embryology
Faculty of Medicine, Alexandria University

Ovary

- **Site :** a pelvic organ located in a depression, the ovarian fossa, on the lateral pelvic wall. It is attached to the broad ligament by the mesovarium.

- **Size and shape :** It is about the size and shape of an almond (3 cm length x 2 cm width x 1cm thickness).

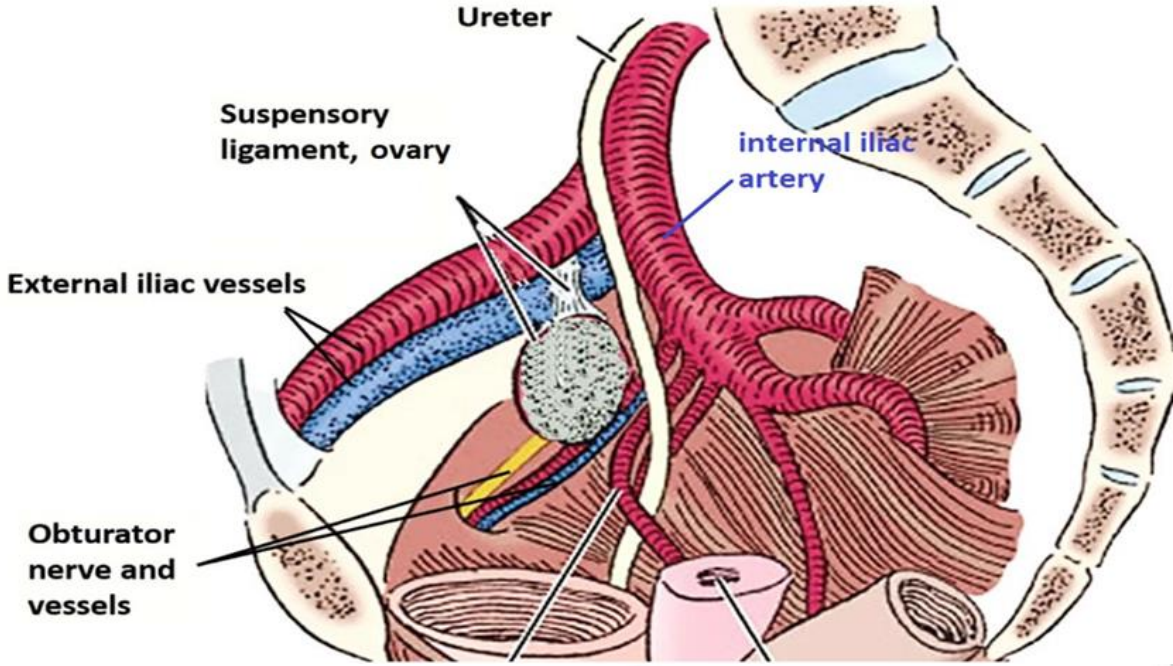

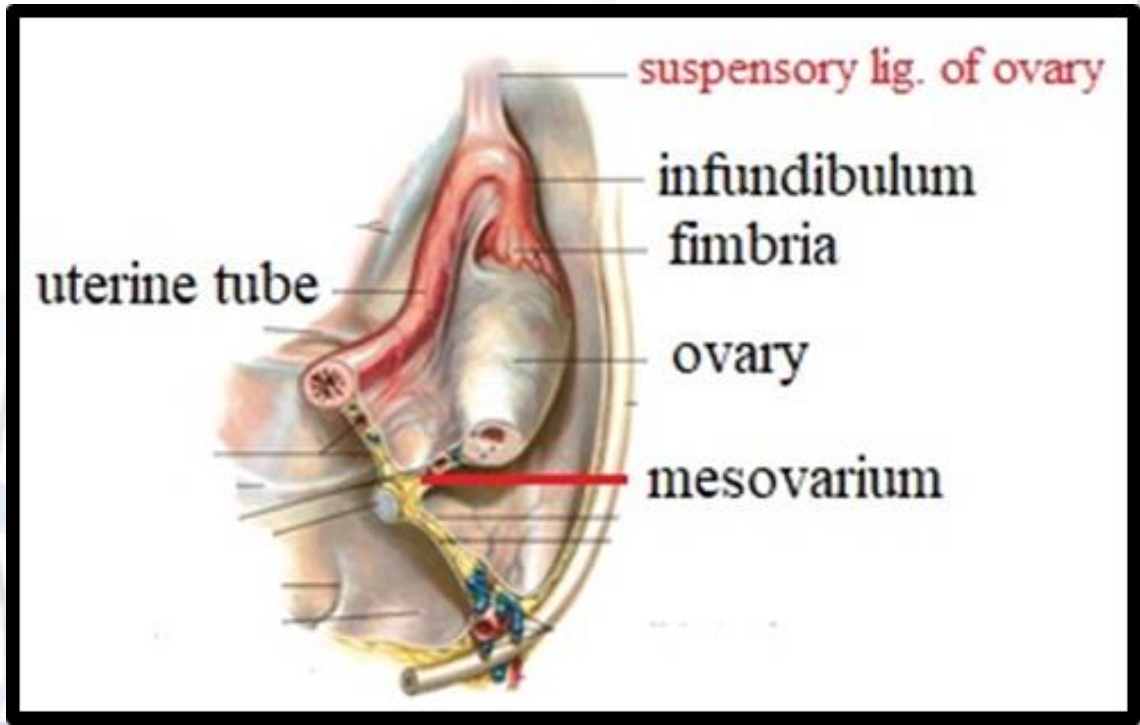

Ovary

- **Boundaries of ovarian fossa :**

- Posteriorly : ureter and internal iliac artery.
- Laterally : obturator nerve and vessels.

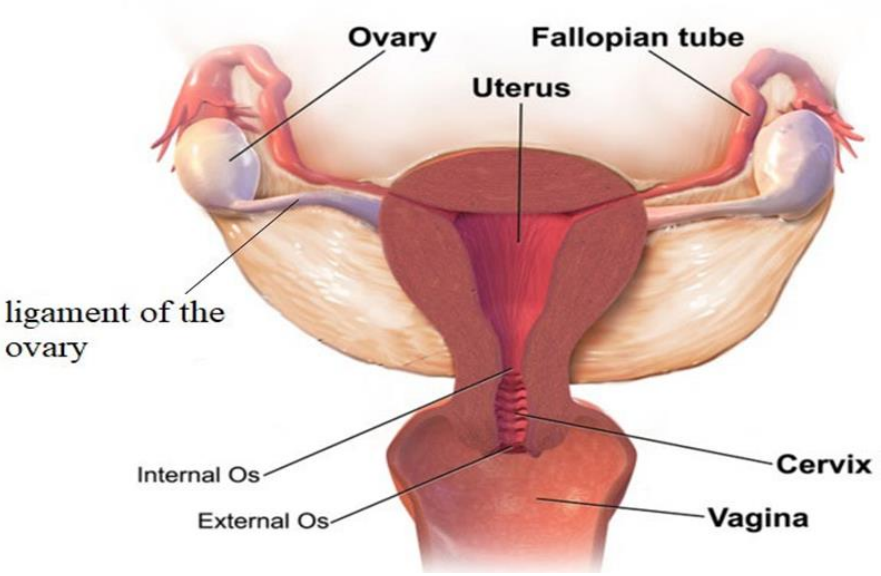

- It has 2 surfaces :
- Lateral surface : related to the lateral pelvic wall, obturator nerves and vessels.
- Medial surface : covered partly with fimbriated end of the uterine tube

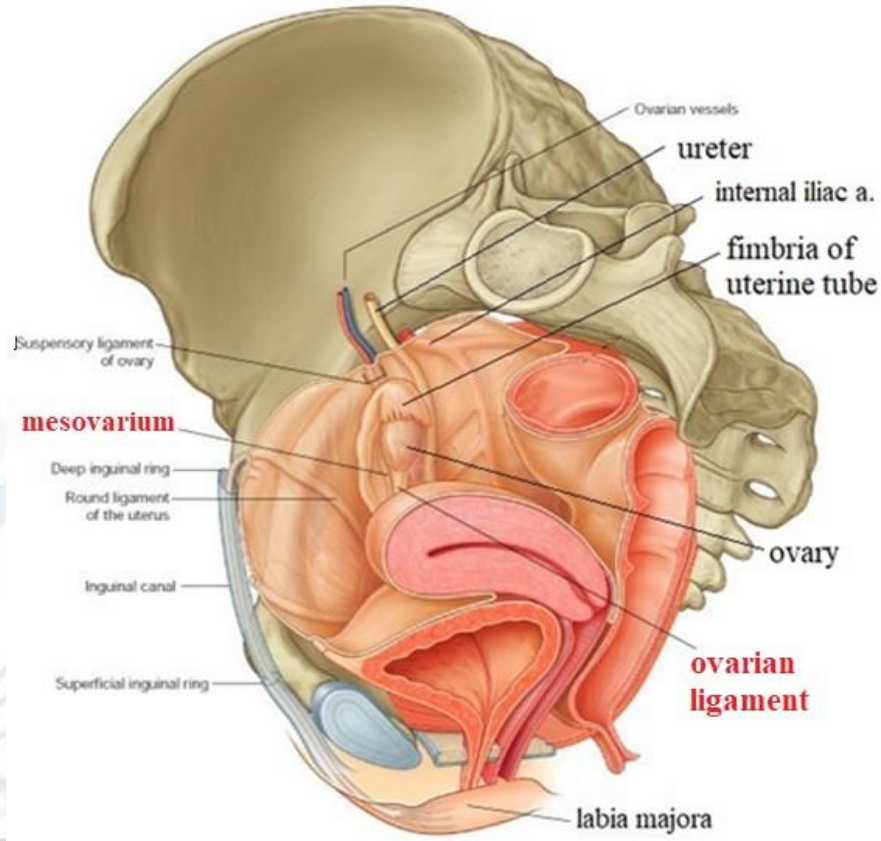

Ovary

- It has 2 borders :
- Anterior border : attached to the mesovarium.
- Posterior border : free.
- It has 2 ends :
- Tubal (upper) end : attached to fimbria of the uterine tube and suspensory ligament of the ovary.
- Uterine (lower) end : attached to the lateral angle of the uterus by the ligament of the ovary below and behind the opening of the uterine tube.

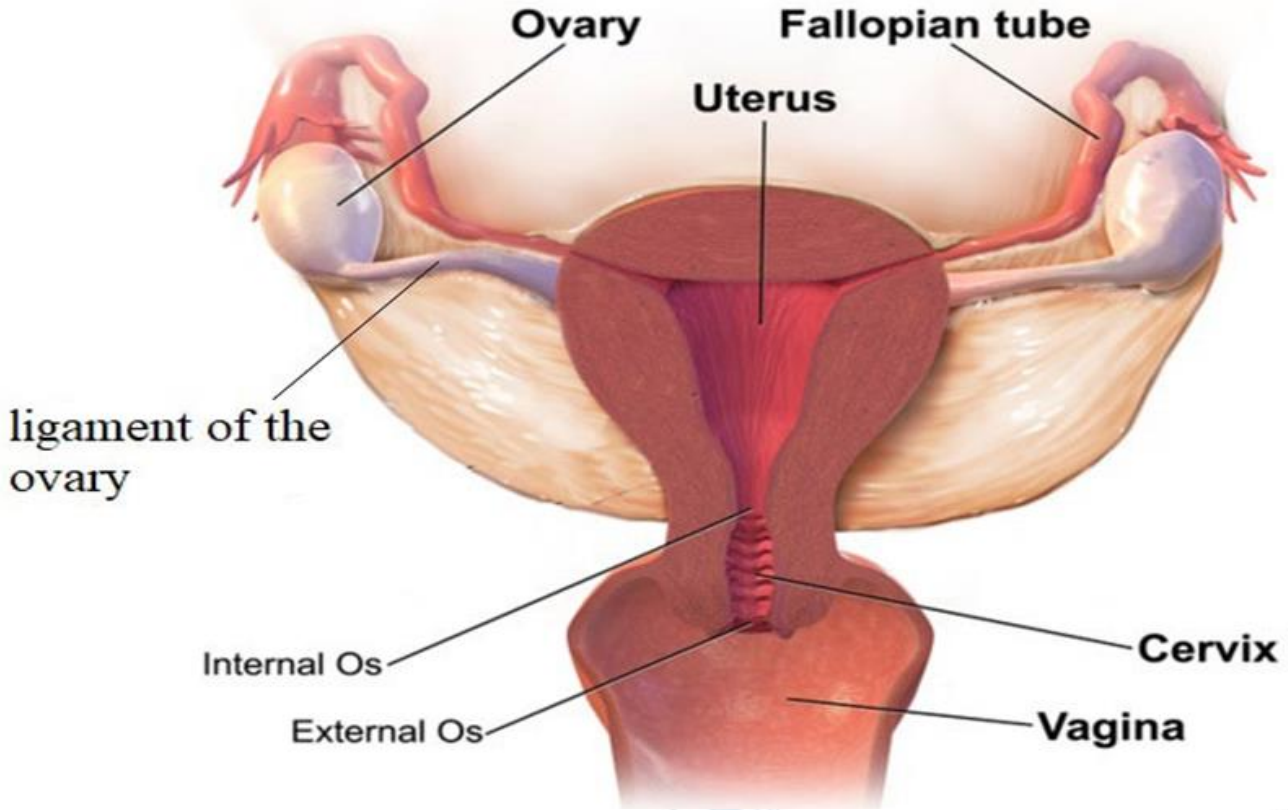

Ovary

- It has 2 ends :
- Tubal (upper) end : attached to fimbria of the uterine tube and suspensory ligament of the ovary.

- Uterine (lower) end : attached to the lateral angle of the uterus by the ligament of the ovary below and behind the opening of the uterine tube.

ALEXANDRIA NATIONAL UNIVERSITY
ANU MEDICAL SCHOOL PROGRAM

Ovary

- It has 2 borders :
- Anterior border : attached to the mesovarium.
- Posterior border : free.

- **Peritoneal covering :**
- It is completely covered by peritoneum except the anterior border that is attached to the mesovarium
