Sacral canal

- It represents the lower part of the vertebral canal.
- It has an upper opening on the dorsum of the first piece of sacrum while the sacral hiatus represents its lower opening.

- Contents of the sacral canal :

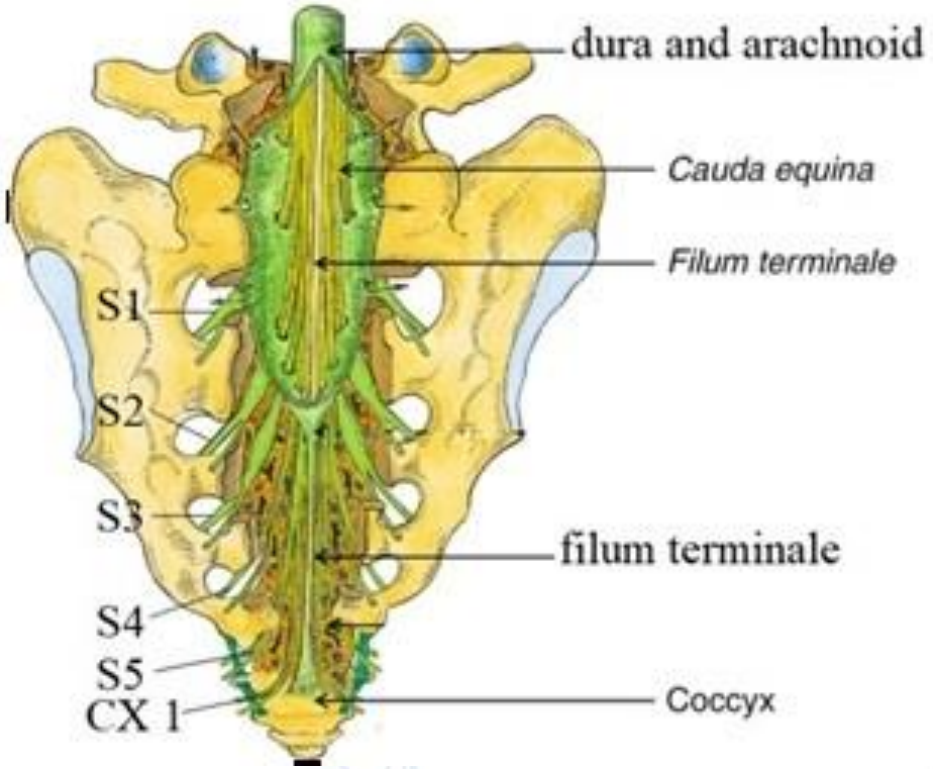

1. Dura mater and arachnoid matter that cover the spinal cord.
2. Lateral sacral arteries.
3. 5 pairs of sacral nerves.
4. One pair of coccygeal nerves.
5. Filum terminale which is the lower extension of the pia mater.

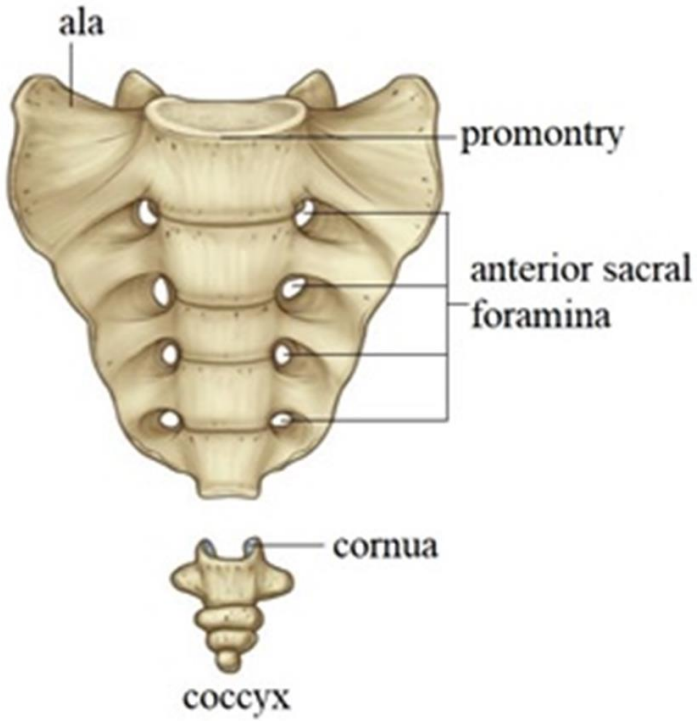

Sacrum and coccyx

- Structures that exit the sacral hiatus :

1- 5th pair of sacral nerves.
2- Coccygeal pair of nerves
3- Filum terminale.

- **Coccyx:**

- It is formed of 2-4 coccygeal vertebrae fused together.
