The Kidney

1) Right Kiney:

- **Posteriorly:** The diaphragm; 12th rib and the psoas, quadratus lumborum, and transversus abdominis muscles. The subcostal (T12), ilio-hypogastric, and ilioinguinal nerves lie between the kidney and the muscles.

2) Left Kidney:

- **Posteriorly :** The diaphragm; 11th and 12th ribs and the psoas, quadratus lumborum, and transversus abdominis muscles. The subcostal (T12), ilio-hypogastric, and ilioinguinal nerves lie between the kidney and the muscles.

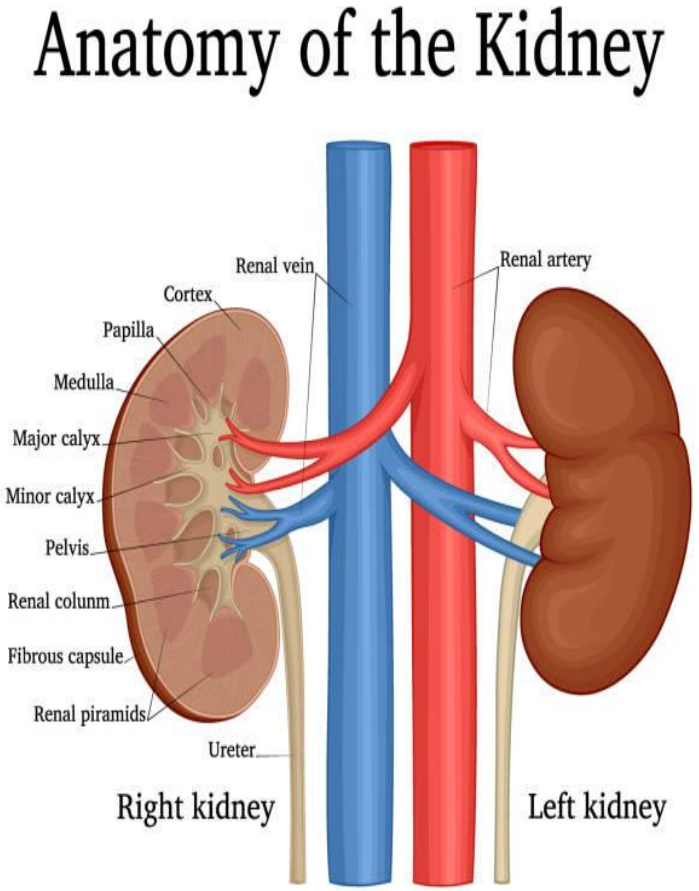

ALEXANDRIA NATIONAL UNIVERSITY

ANU MEDICAL SCHOOL PROGRAM

Blood supply of the kidney

Arterial supply

Renal arteries arise from the abdominal aorta at L2.

ANU MEDICAL SCHOOL PROGRAM

The Kidney

Close to the hilum of each kidney, the artery divides into five segmental end arteries. These segmental arteries supply the segments of the kidney.
