Lect. 49 : Development of the kidney and ureter I (Anat.14)

Prof. Dr. Maha Diaa Safwat

Human Anatomy and Embryology Department

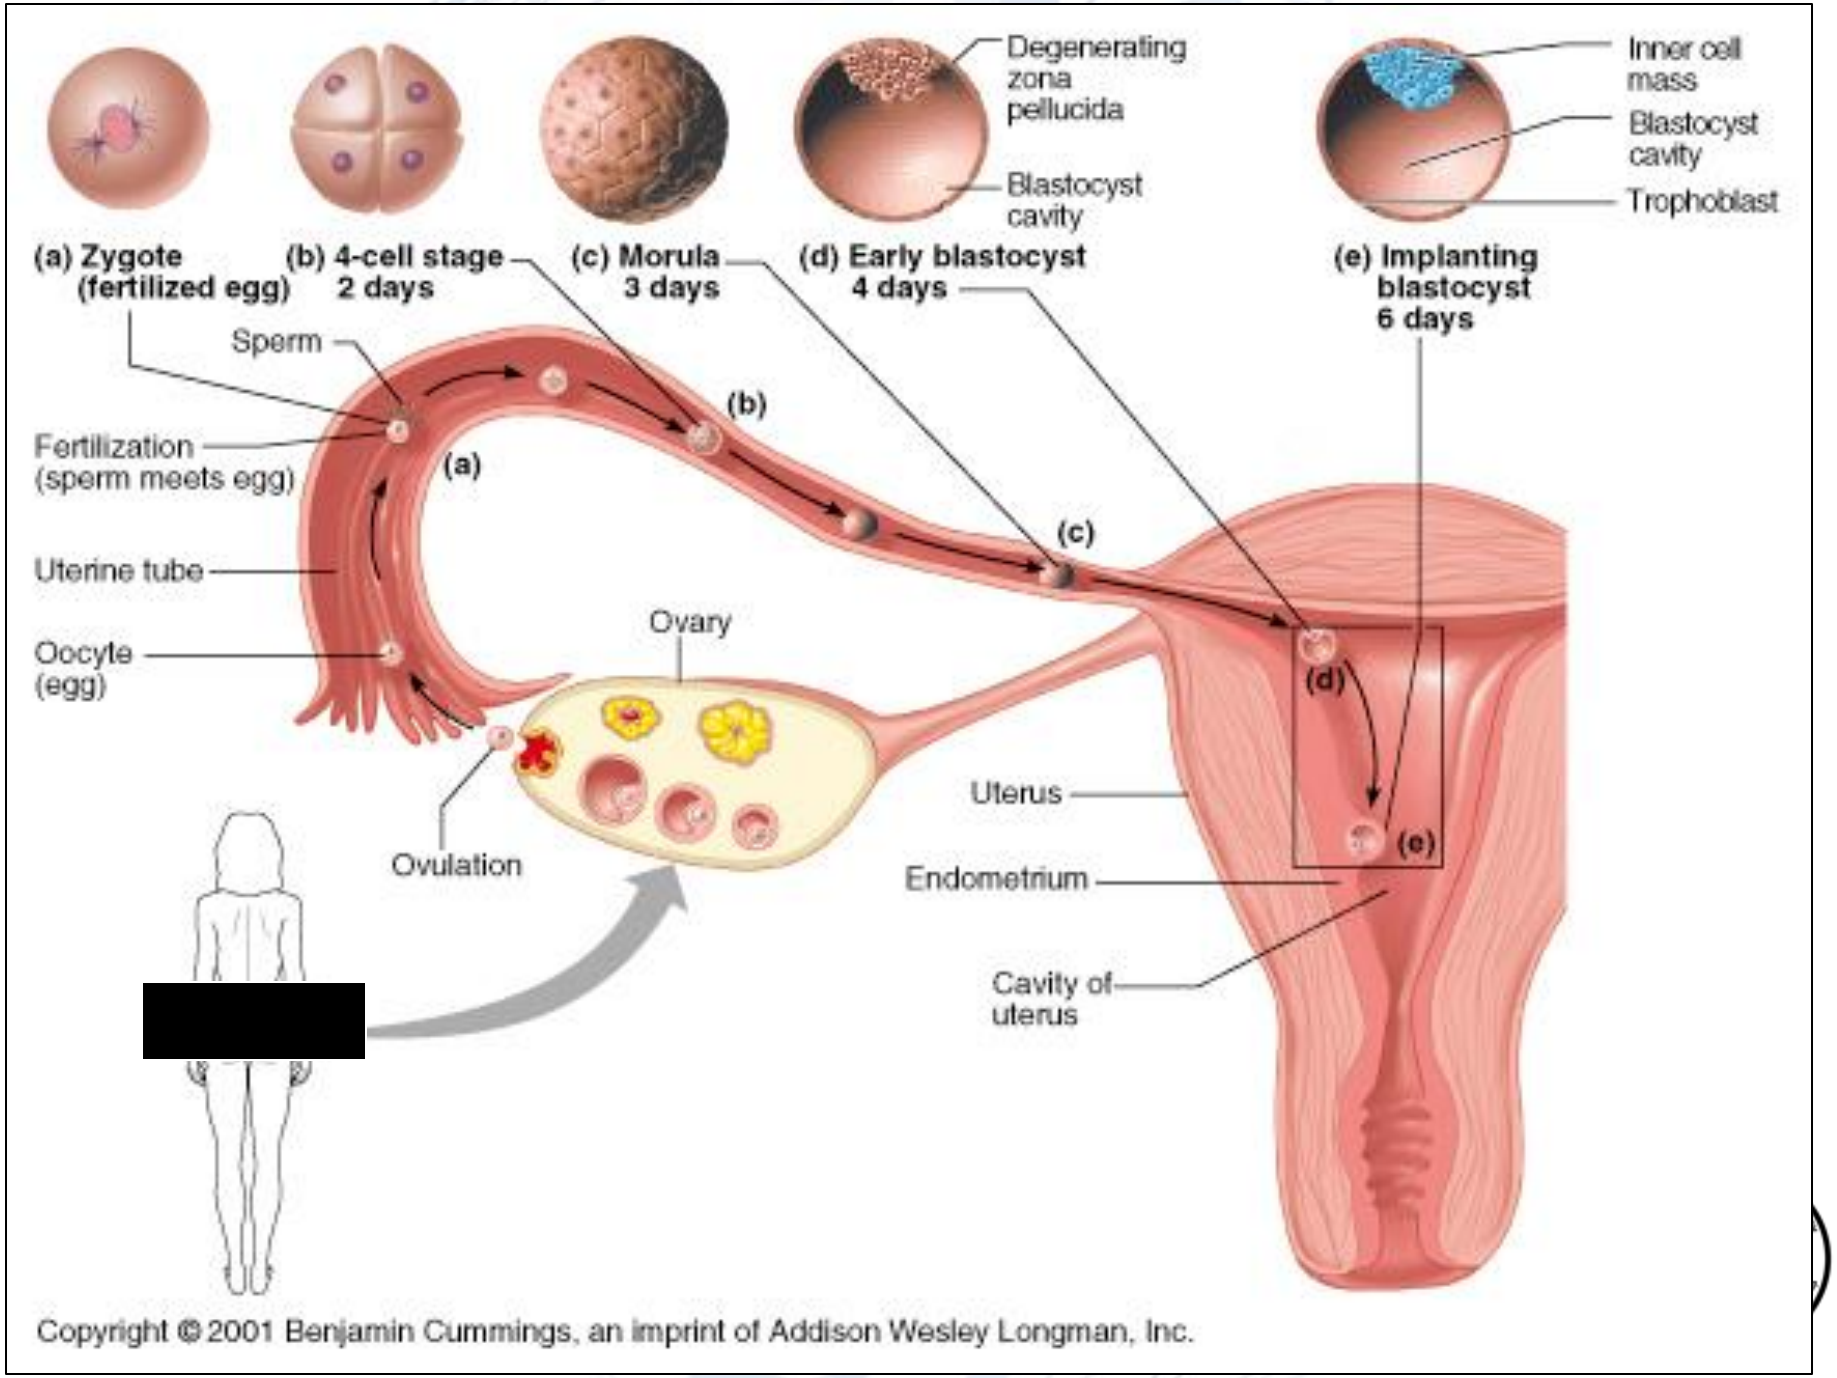

Development of the kidney and ureter

ILOs:
1- Describe the stages of development of the kidneys and ureters.
2- Relate the congenital anomalies to their embryological origin.
3- Appraise the congenital anomalies which could affect the kidney and ureter in relevance to their developmental process.

ANU MEDICAL SCHOOL PROGRAM

Development of the kidney

- The kidney develops from the intermediate cell mass of the **mesoderm**.
