Derivatives of the genital ducts in males

- Mesonephric duct & tubules :

- The mesonephric tubules persist as the efferent ductules.

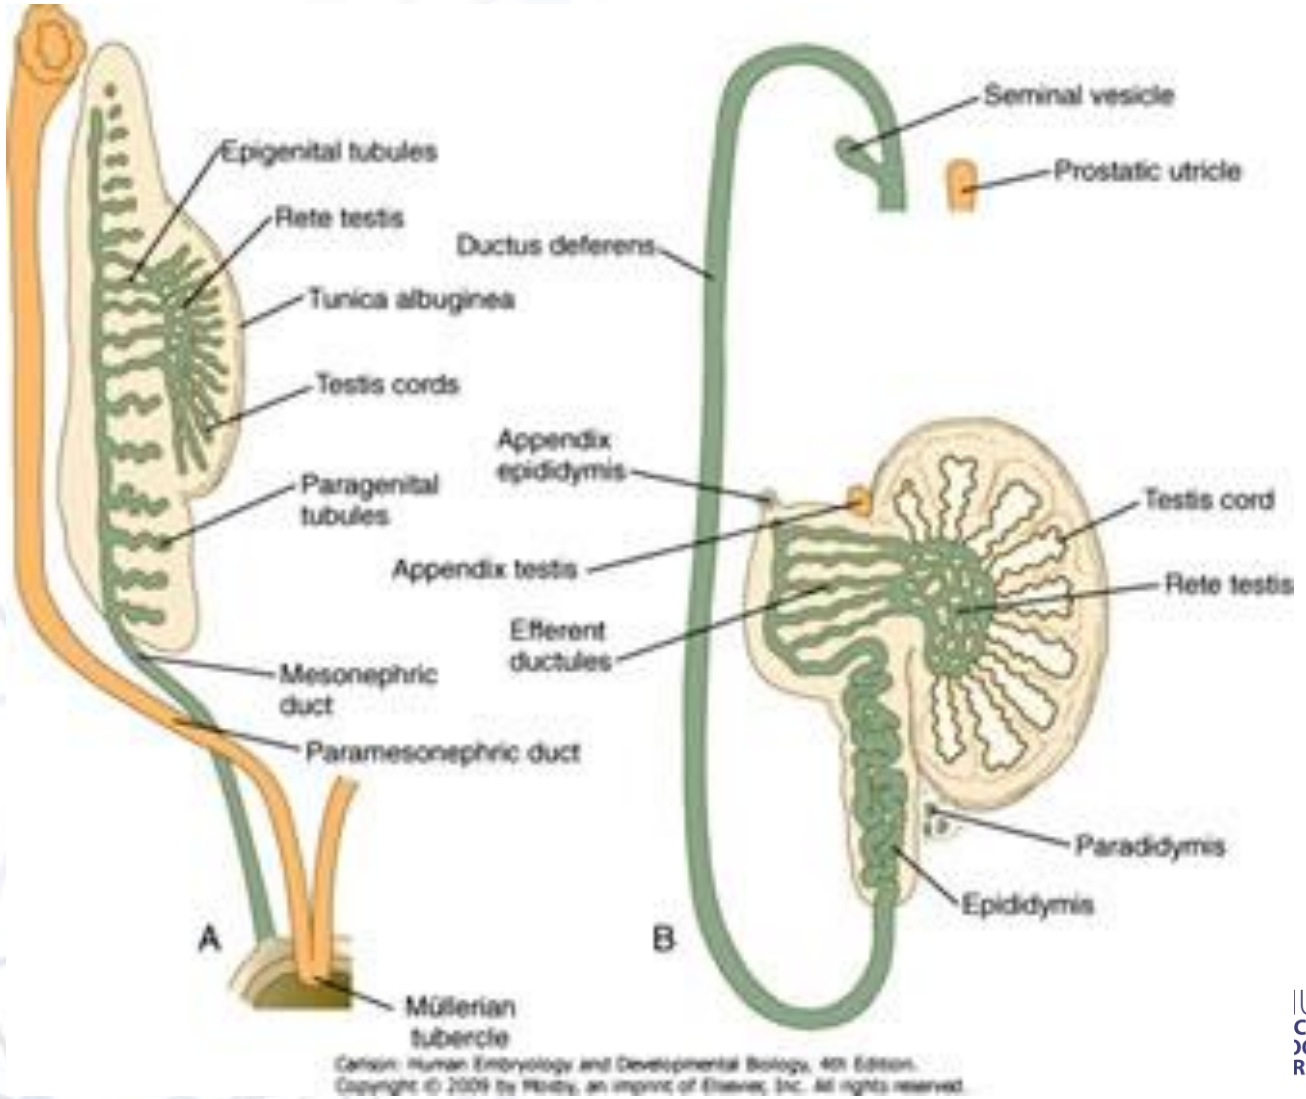

- The mesonephric duct persists as the epididymis, vas deferens, seminal vesicle and ejaculatory duct.

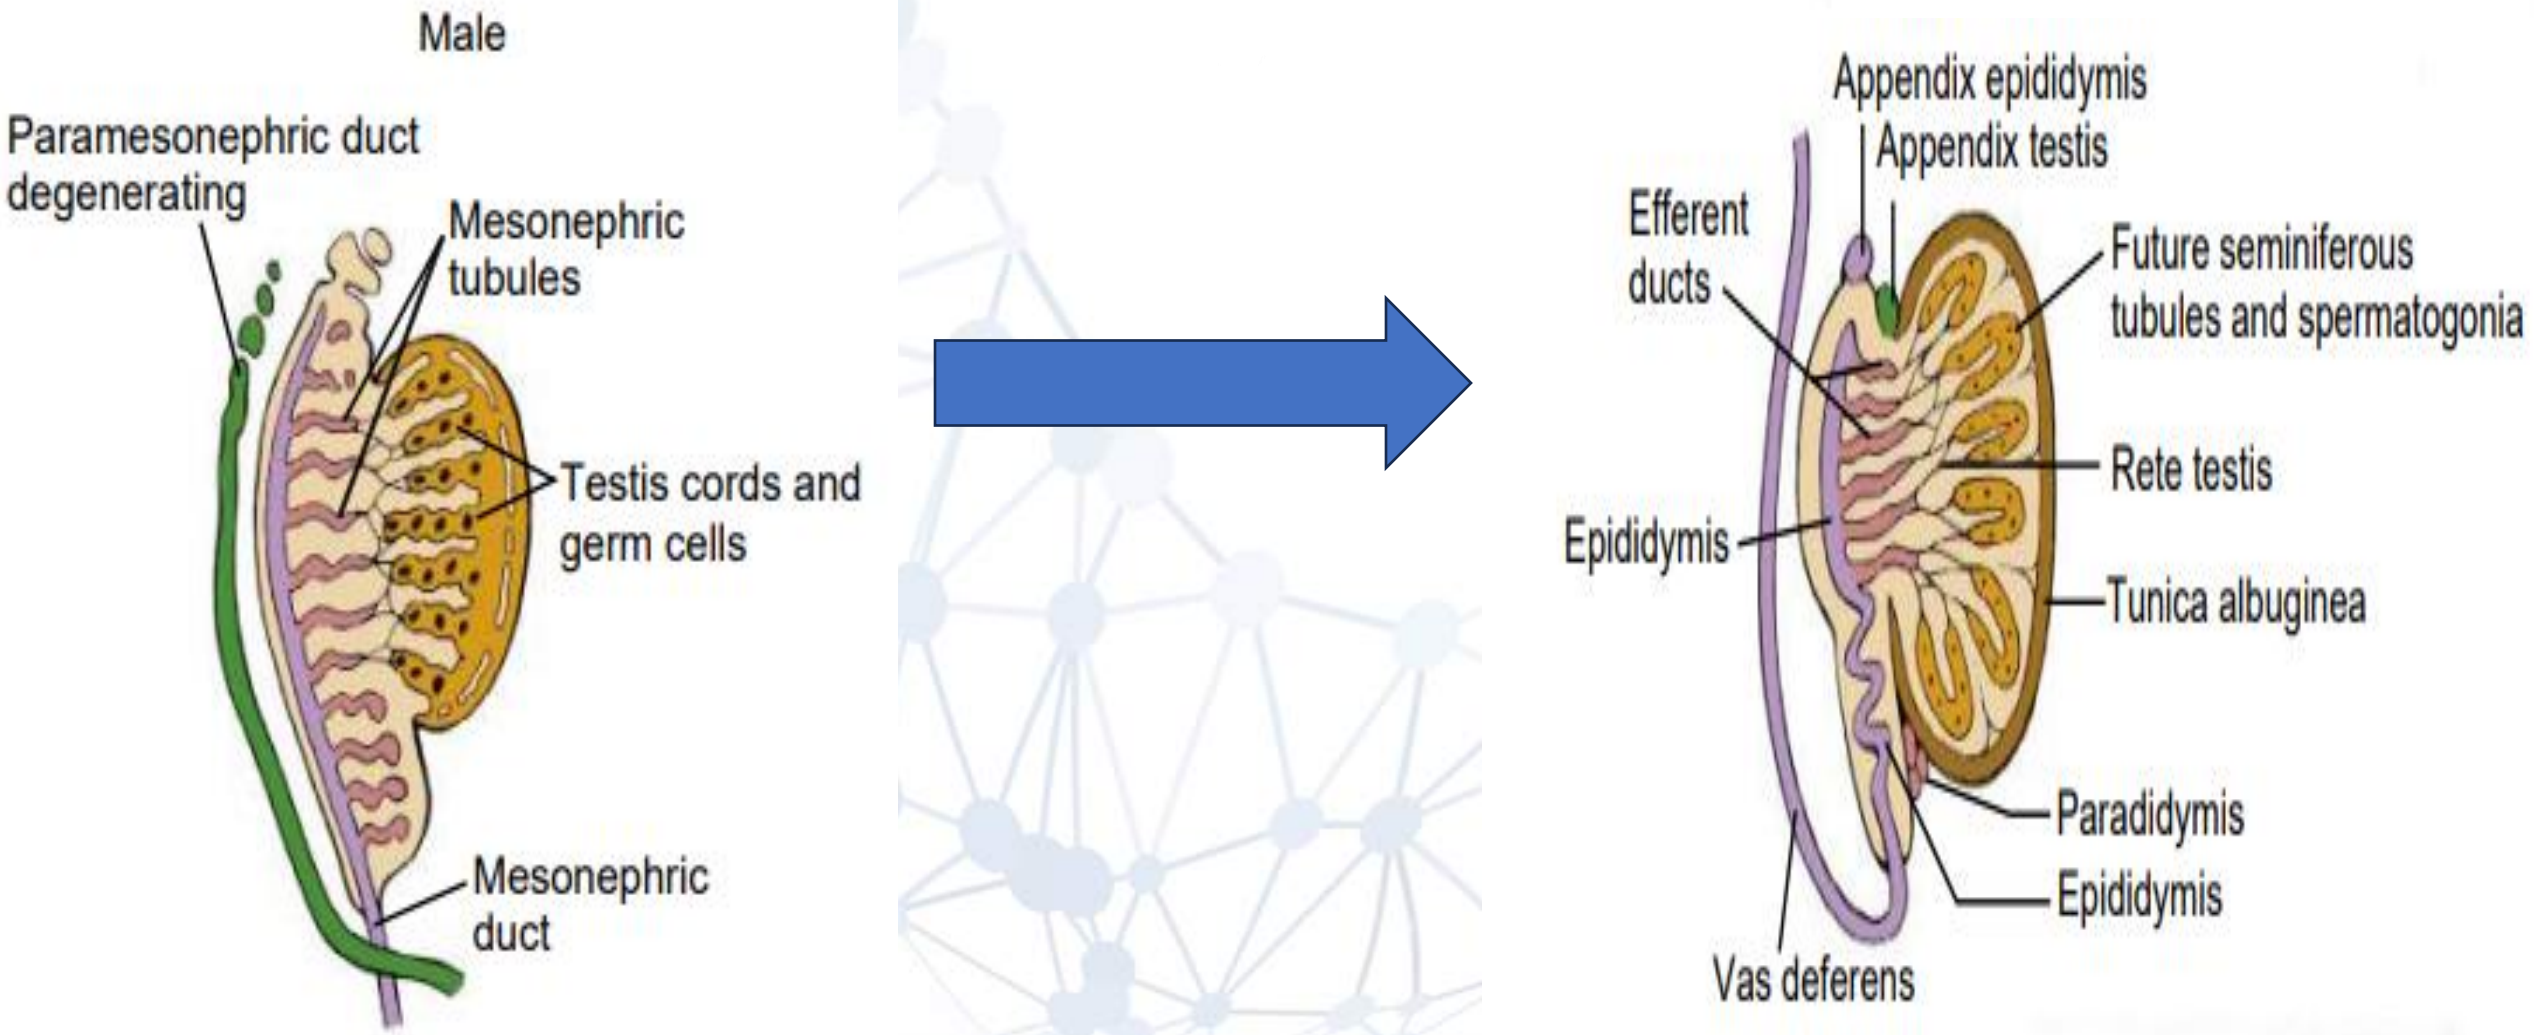

Derivatives of the genital ducts in males

- Paramesonephric duct :

- It degenerates except its cranial end that persists as the appendix of the testis and the caudal end that persists as the prostatic utricle.

Male
Paramesonephric duct degenerating
Mesonephric tubules
Testis cords and germ cells
Mesonephric duct
Appendix epididymis
Appendix testis
Efferent ducts
Future seminiferous tubules and spermatogonia
Rete testis
Epididymis
Tunica albuginea
Paradidymis
Epididymis
Vas deferens
